EVOdrink

The most efficient and sustainable solution on the market

This market-leading filter combines numerous patents and technologies to effectively and permanently remove all toxic substances. This makes it the only filter in the marketplace that does not develop germs thanks to our in-house technology. It does not use chemicals, UV light or ozone, as do competing products. Moreover, thanks to this technological innovation, it does not require wastewater or electricity.

With this filter, you can enjoy clean water at all times, guaranteed 100% free of micro-plastics and perfectly suited for baby food.

The filter surface is equivalent to the size of 150 football fields.

	Size in μm (Micrometer)
Human hair	100
Sediments	10
Bacteria	1
Viruses	0.1
Micro-plastics, pesticides hormones & heavy metals	0.01
EVOdrink filtration	0.002
Minerals	0.001

2

EVOcharge

Soft and healthy for maximum drinking pleasure

The EVOcharge simulates around 15 to 20 kilometers of natural spring water travel. As a result, the water tastes softer and more digestible, as experienced in natural springs where the water is constantly in motion.

The patented rotation technology is state-of-the-art and has been tested several times in different laboratories. The corresponding effect on cell metabolism has been certified by renowned institutions. In this way, cell activity and cell hydration is increased by 46%.

The water is rotated at 2,000 revolutions per minute.

- Velvety, soft and digestible taste
- Proven to hydrate twice as fast
- Brings out flavors in coffee and tea
- Boosts the immune system

Awarded quality product

Sustainable and environmentally friendly

Water filter specialist of the year

Recommended by gourmet chefs

Highest quality standards

The most important certification for food, supplements and medicines in the USA.

The FDA (U.S. Food and Drug Administration) has confirmed that Evodrop systems do not release any harmful substances into water.

SGS is the world's leading testing institute for water treatment systems.

SGS has officially certified that the EVOdrink has a filtration efficiency over 99% for heavy metals, bacteria, viruses, micro-plastics, drug residues, chlorine and pesticides.

Europe's highest safety certification for food contact materials.

The systems have been officially MOCA certified, confirming that no harmful substances or germs are introduced into the water through the EVOdrink.
